

Medical information you can trust!

<http://www.HealthOnNet.org/>

www.provisu.ch

Trustworthy online information on vision disorders, eye diseases and the prevention of blindness.

- All visual diseases
- Diagnostic techniques and therapeutic care in ophthalmology
- Patient support associations and organizations
- Directory of Ophthalmologists
- Image database

ProVisu.ch

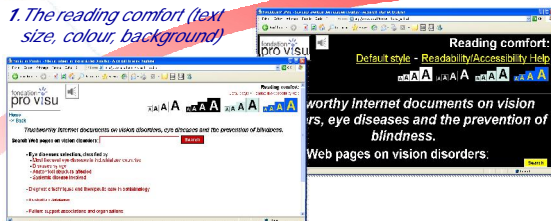

has the goal of raising awareness about all eye diseases including age-related eye diseases and the need for early detection and rehabilitation services.

ProVisu.ch provides a one stop information service in English and French to the community and to general practitioners about eye diseases, available treatments and patient support groups.

It is accessible to blind or visually-impaired persons. This directory refers only trustworthy and reliable health information.

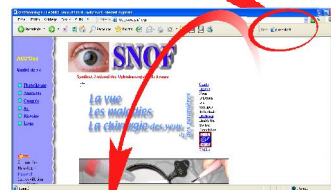

Approaches implemented by HON in the **ProVisu** website:

1. The reading comfort (text size, colour, background)

Trustworthy internet documents on vision disorders, eye diseases and the prevention of blindness. Web pages on vision disorders.

3. The adaptation of external websites (via a bookmarklet)

2. The seamless speech-enabled service and the navigation with the keyboard
